

Does YOUR fence need help?

IF you're not up for replacing your whole fence

Simply use Lightning offsets (standoffs) and SAVE!

You won't find tougher, better-priced offsets anywhere else.

In fact, we're so confident that you're getting the best value for money — WE WILL BEAT ANY LISTED PRICE!

Threading wire through miles of porcelain insulators is crazy!

Lightning offsets are quick and easy to use. Just slip the hot wire into our unique insulated "jaws" and forget it for years.

Don't worry about maintenance

Lightning offsets have strong, long-lasting insulators that won't let go! So wire remains firmly in place.

They're made to withstand the harsh Australian sun, and to take the knocks so you won't have to worry about them for years to come!

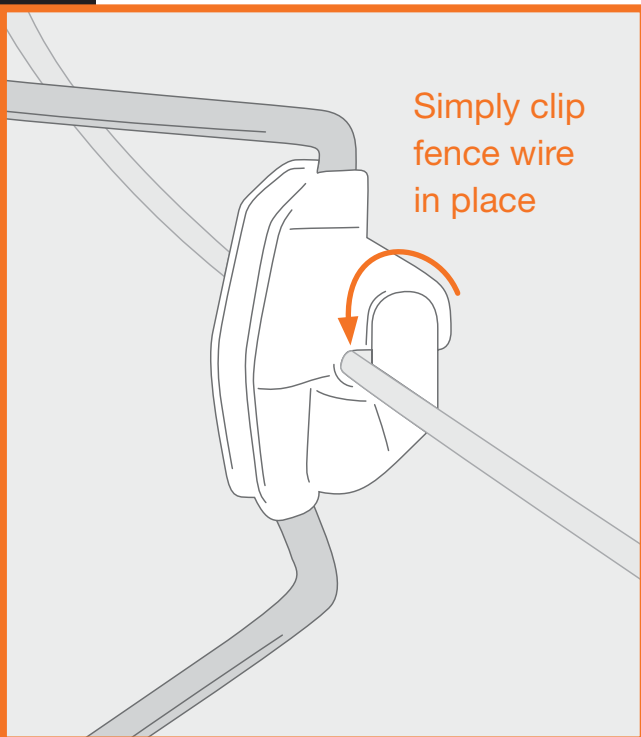

AND Lightning offsets can handle 12,000 volts without arcing.

You don't even need to switch systems!

Lightning offsets will work perfectly on any type of fence with all electric fence systems.

And if you DO change fences — NO PROBLEM! Lightning offsets are fully re-useable making them ideal for temporary fencing too.
