*eg FD691 (see current price list F11)

^oeg Olive - all standard droppers are colour coded - and we paint the top tail of the dropper in that colour

Sizing Charts

To simplify selecting the right dropper, we have posted a series of easy to use charts on our website at www.fencedropper.com/page/home/sizing-charts.

The charts show our range of fence droppers designed to suit each of the following fence posts: Steel Star & JIO Posts • Clipex Posts • Pre-Stressed Concrete Posts (Easy Drive and Violet Town)

We have also provided a blank chart, showing only the post and its hole spacings, for each type of common fence post to help you and your customers design your own custom fence dropper.

Useful Tip 1. Tell us if your customer is re-ordering the same dropper as previously ordered. We can easily look up the spaces from last time.

Useful Tip 2. We can advise if there is one type of fence that predominates in any particular region.
